

LEDINEK - ENGINEERED TIMBER - GPROPRESS

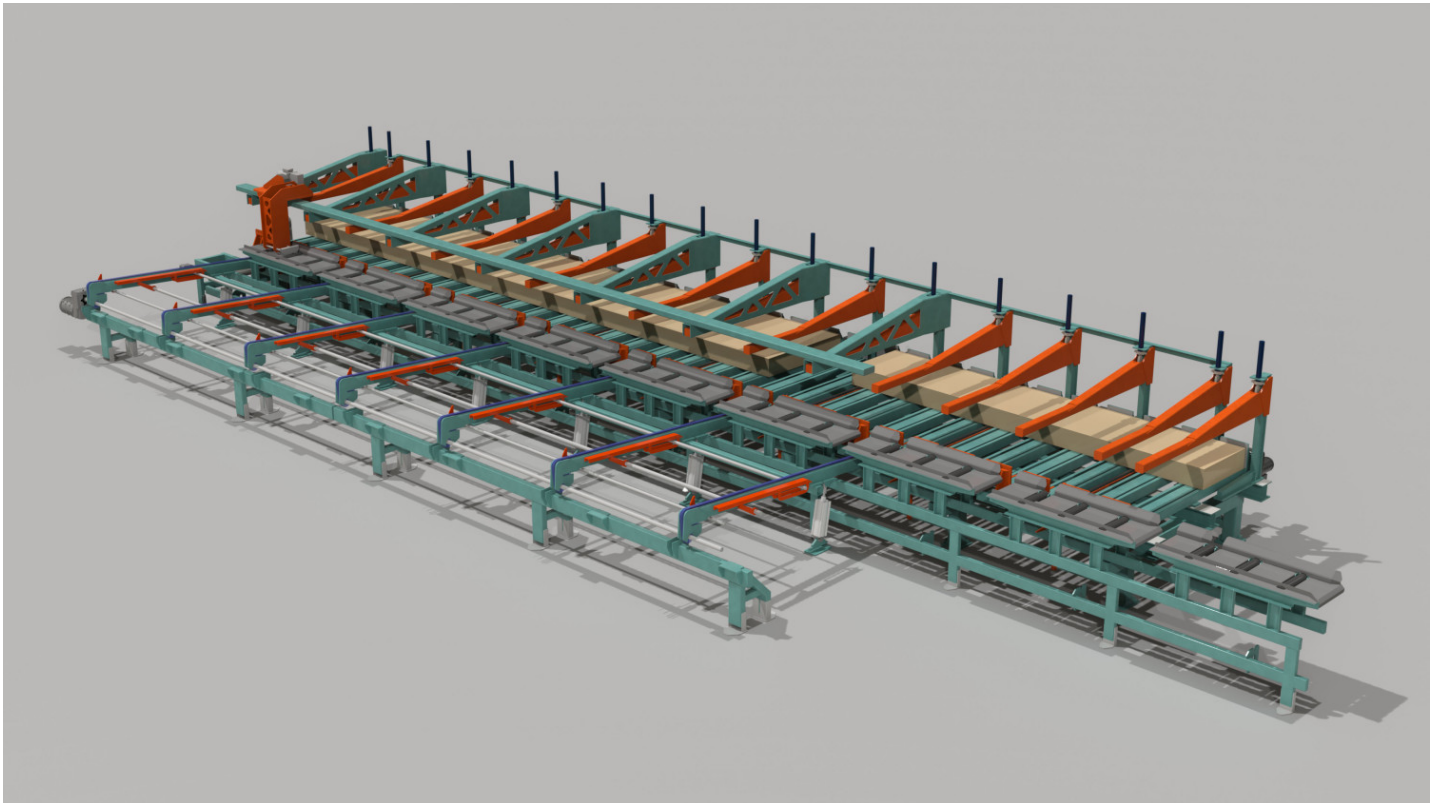

GproPress - Glulam Made Simple

The **GproPress** is a compact yet highly efficient press designed for the automated production of straight glulam timber (GLT). The entire manufacturing process—from glue application, layup, press loading to side alignment, pressing, and unloading—is fully automated, requiring only a single operator for supervision.

Compatible with PUR, MUF, EPI, and other cold-curing adhesive systems, the GProPress offers maximum flexibility to meet a wide range of production requirements while ensuring consistent product quality.

Its modular and forward-thinking design allows the press length to be extended at any stage, enabling manufacturers to increase production capacity and accommodate longer timber elements as business demands grow. This makes the GProPress an ideal solution for both new production facilities and companies planning future expansion.

The combination of automation, flexibility, and scalability delivers a cost-effective entry into glulam manufacturing while maintaining high productivity and reliable performance.

Highlights:

- Straight glulam, DUO and TRIO beams, blockhouse elements
- Stepped batches
- Automatic positioning fence for lamella
- Small footprint
- Motorized clamping
- Pressure control
- Short loading and curing time

Advantages of fast glue press

- Fast cycle for commissioning goods
- High output volume at full load
- Highly adaptable production
- Automated process

Technical data

GPROPRESS 1400-12

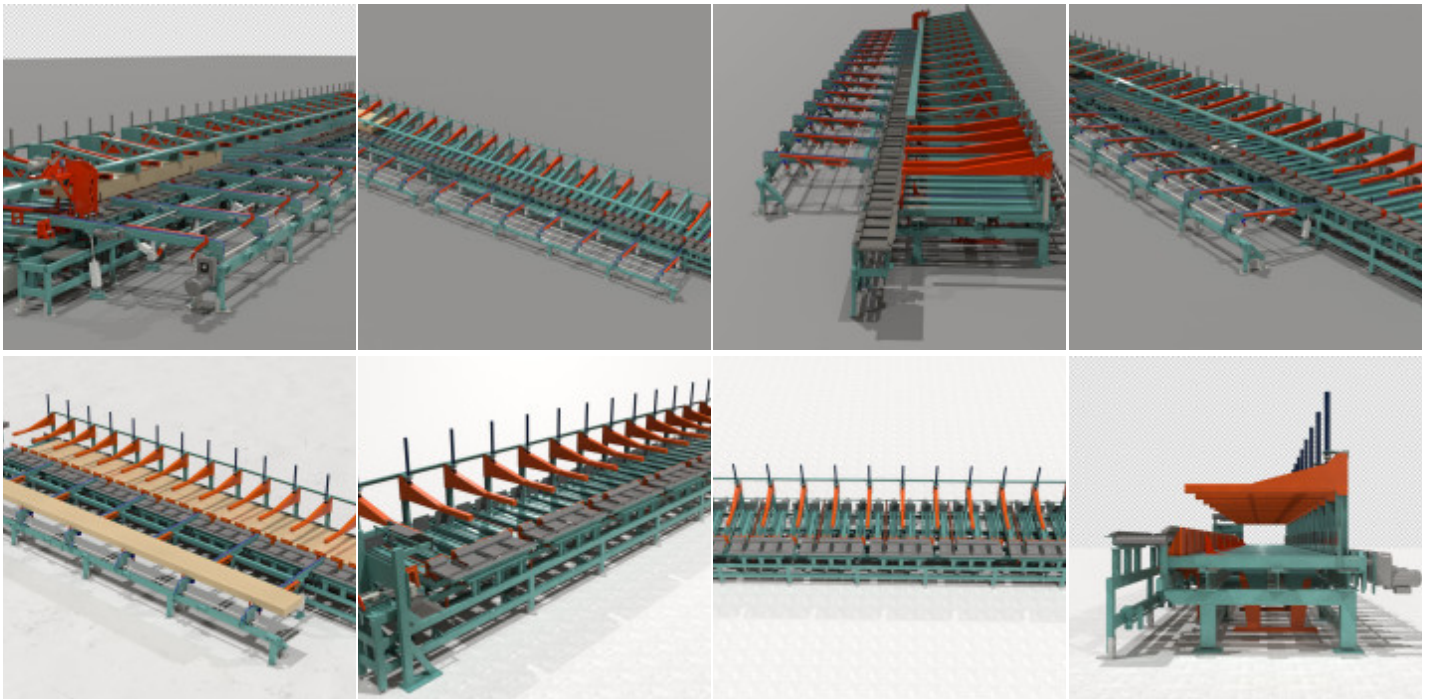

| | |
|--|----------------|
|  Pressing width | 200 - 1.400 mm |
|  Lamination width | 80 - 310 mm |
|  Pressing length | 4 - 12 m |

Technical data

GPROPRESS 2200-16

| | |
|--|----------------|
|  Pressing width | 200 - 2.200 mm |
|  Lamination width | 80 - 310 mm |
|  Pressing length | 4 - 16 m |
