

LEDINEK - ENGINEERED TIMBER - LKS 600 / 1000 / 1300

LKS 600 / /1000 / 1300

Cross-cut saw for large cross sections

Robust and accurate LKS saw for exact length trimming of straight laminated or solid timber. A large diameter circular sawblade is used to cut laminated timber, singled or in batches up to 2 m in width to exact length. Sawblade is retracted under the table to expedite the process.

Highlights:

- Exact length cut of layers
- Positioned end-stopper
- Up to 2 m batch width – different lengths
- Under-table version
